PROFESSIONAL SUMMARY

Data Analyst with an MBA in Finance and a B.Com in Computer Applications, with internship and project experience in retail analytics, SQL reporting, Python data validation and Power BI dashboards. Analyzed 182,081 records across seven retail datasets, reconciled 16/16 metrics between Python and SQL, and quantified ₹13.94 lakh in approved, matched refunds. Cut manual MIS reporting time by 30% through SQL and Power BI automation. Skilled in data cleaning, KPI reporting, profitability analysis and customer segmentation. Available within 15 days.

TECHNICAL SKILLS

SQL & Databases: SQL Server, MySQL, T-SQL, Joins, CTEs, Window Functions, Subqueries, Aggregations, CASE WHEN

Python & Analysis: Python, Pandas, NumPy, Jupyter Notebook, Data Cleaning, Data Validation, EDA, Reconciliation, Root-Cause Analysis

BI & Visualization: Tableau, Power BI, DAX, Power Query, Dashboards, KPI Reporting, Data Modeling, Star Schema, Data Visualization

Excel & Reporting: Advanced Excel, PivotTables, XLOOKUP, VLOOKUP, SUMIFS, Conditional Formatting, Charts, MIS Reporting, Report Automation

Business Analysis: Trend Analysis, Insight Generation, Profitability Analysis, RFM Segmentation, Cohort Retention, Data Quality Checks, Stakeholder Reporting

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Analytics Space LLP, Hyderabad (Remote) Oct 2025 – Sep 2026

- Automated retail performance reporting using SQL queries and Power BI dashboards, reducing manual MIS reporting time by 30%.
- Completed 20+ SQL analyses covering revenue trends, customer behavior and cohort retention to surface trends and insights.
- Developed RFM reports segmenting customers into Champions, Loyal and At-Risk groups.

Data Analyst Intern | Intellectra AI Solutions Pvt. Ltd. (Remote) May 2026

- Developed Python (Pandas) and SQL data-cleaning and validation workflows for multi-table retail datasets, checking duplicate keys, inconsistent identifiers, unmatched product records and date anomalies.
- Reconciled 16/16 analytical metrics between Python and SQL and documented data-quality exceptions to improve KPI reporting reliability.

PROJECTS

RetailNova Inc. – End-to-End Retail Performance & Behavioral Analytics | SQL Server, Python, Power BI

- Built a five-page Power BI dashboard tracking $817K revenue, 29.81% profit margin and 6.68% return rate.
- Cleaned and integrated five sales, customer, product, store and returns datasets in Python; loaded them into SQL Server and answered 10 business questions in T-SQL.

Retail Chain Profit Leakage & Demand Optimization | Python, SQL

- Profiled 182,081 records across seven datasets for a 50-store chain; investigated duplicate keys, inconsistent store IDs, unmatched products and vendor-delay discrepancies.
- Quantified ₹13.94 lakh in approved, matched refunds and reconciled 16/16 metrics; found monthly margins stable at 13.5%–13.9% (Jan–Jun 2025).

EDUCATION

MBA, Finance | Santhiram Engineering College, Nandyal 2023 – 2025

B.Com, Computer Applications | Rayalaseema University, Kurnool 2020 – 2023

CERTIFICATIONS

SQL (Intermediate), HackerRank | Intermediate Python, DataCamp | Power BI Data Analyst Learning Path, Microsoft Learn | Data Analytics with Generative AI, Texas Tech University / ExcellenC | Data Analyst Skill Certification, OneRoadmap | Deloitte Data Analytics Job Simulation, Forage
